E-Check: Safe and Secure by Angie Turner

Article published on May 18th 2012 | Finance

Ever since the banking system first came into existence, the business community was the first to be benefited from it. Though it still remains true, what has drastically changed is the manner these banking transactions now take place. For instance, the use of e-check has almost made the credit cards and debit cards a thing of the past.

The e-check is a banking mechanism especially designed in a manner to get rid of the safety hazards associated with use of credit or debit cards. This is especially true keeping in mind that with emergence of so many instances involving the faking and tempering of credit cards, this is no longer viewed as a secured mode of payment. Besides, anyone with knowledge of internet and computer can â€˜stealâ€™ the credit card information.

The ideal solution under these situations is the use of electronic check method. Besides giving the business community the advantage of enjoying smooth and quick electronic payments, it saves their valuable time as well.

Currently, there are two different ways of handling the e-check. These are either through a phone or by online method. Ease in operation has given the users their share of peace of mind. Of course, handling this issue without getting vital information can be a big threat. This vital information ordinarily comprises of a bank account number as well as the ABA number. It is a usually practice to find the routing number in paper checks. At times, the bank can furnish you with the routing number on contacting them in the event that these checks are presently not in your possession. Under this method, you have the liberty to choose auto payment by setting your bill payment schedule. Thus, it becomes comfortable for you to avoid the receipt and payment ordeals.
