Article published on April 8th 2012 | Finance

Pip Rebate works as the business introducer or a referring broker/agent. That being said, we are compensated with a percentage of each spread. Different brokers will offer a variety of incentives in order to send the clients to use their services and we put a big chunk of the commissions to you, the trader.

Pip Rebates works with the industry's, most renowned brokerage firms with trade worthy instruments such as cash, stocks, commodities, indices, CFDs and others. Apart from our selection of capable brokers, our site is handled by reliable and responsible staff members who are knowledgeable to help you with your queries for most hours of the day.

Our service gives us the opportunity to pay you cash every time you trade with Forex brokers. The trading conditions and spreads at the brokers that we represent are not affected when you create an account with us because this would be a counter-intuitive action for our traders and ultimately our business structure.

A small portion of the money is used by the site to cover expenses. To get you started with your trading goals, you simply register to Pip Rebate. Registering is easy and free, so you do not have to spend anything to get your account running. Simply type in the details.

Once you have registered, you can view our table for broker comparison or simply check the list of brokers on the site. Each broker will have his or her own profile that you can use as a reference when deciding on the right broker for your trading.

Once you have selected the broker of your choice, you simply open your trading account if you haven't opened one yet. If you wish to create a new account, you simply have to follow a few instructions for new accounts. If you do have an existing account, just follow the instructions for these accounts. If the account is missing, please send us details and our staff will be helping you out along the way.

Once you have logged in to your account, you go to the payment information page. From there, you just complete the form so we know the details on how to give your rebates. Please edit and check the details that you have placed so that errors in sending funds can be avoided.

The cash rebates that you earned from trading will be send every month. If you wish to know more about our payment options and process, you can check our payments page for more information.
