Same Day Loans are Made Simple with Payday Mart by [Adair Sawyer](#)

Article published on December 2nd 2011 | [Finance](#)

Are you tight on cash? Has a situation presented itself that needs your immediate financial attention? If so, then you will need to consider same day loans services that can provide you short term loans and assist you with your financial problems. The good news for UK residents is that there is a very reliable and professional same day loans service that can provide you with just that.

Payday Mart is the UK's premiere provider of short term loans. They have years of proven experience when it comes to assisting UK residents in acquiring small or large short term loans with limited effort. In fact, they are the number one resource that you have at your disposal in the United Kingdom for this type of immediate service.

The same day loans services of Payday Mart are exceptional for numerous reasons. However, one of the main reasons for their success is discretion and convenience. In order to acquire short terms loans through this service you don't need to visit an in-person retail centre. This will save you from the embarrassment of attempting to acquire a loan in an in-person service area surrounded by other people. You can make use of Payday Mart by simply logging onto their website. There is no reason why you should waste your time travelling all around town from one lender to another, when you can easily apply for these types of same day loans from your home.

Cost is another reason why the same day loans services of Payday Mart continues to grow in popularity. The general pricing scale of short term loans from Payday Mart is £30 per £100 pounds that you borrow. Therefore, if you borrow £200 from Payday Mart you will be charged a fee of £60 plus the £200 that you borrowed. This adds up to £260.

The way the service works is that you will be required to pay back the money borrowed along with the service fee by your next payday. However, if you are in need of an extension when your next payday presents itself, you can request such an extension from their website. When acquiring an extension you will be required to immediately pay the service fees. You will then be charged new service fees and will have until your next payday to complete payment on the loan.

The best part of Payday Mart is how simple their services are to use. To apply for a loan between £80 and £1000 you simply need to visit their website and complete their online application. This application is very short and will generally take you between five and ten minutes to complete. Upon submitting your application you will generally be approved or declined for your loan within five minutes. It is this speed of service that truly sets Payday Mart apart from their biggest competitors.

If you want to acquire a payday loan quickly and want to avoid common hassles with in-person lenders, then you should immediately visit the website of Payday Mart.
