Boys who love to play in the virtual world have a myriad of free online games to choose from. Below are the four online boys games that I think are hugely popular amongst boys –

California Pizza delivery: One has to play the role of the pizza delivery guy! Zap down the streets and deliver the pizzas on time. Thrill, fun and challenge this game promises all three. Driving safely and delivering the pizza on time gets you the points. You can play the ten levels and still not tire of the game.

The arrow keys are used for moving the vehicle forward and the spacebar is used to apply the brakes. You have to keep away from the sidewalk, steer clear of bikes and cars on the road and park at the allotted place. This game is a sure test of your driving skills. So rev up the engine and get set go!

Lax Shuttle Bus: Yep! You guessed it right. You can drive again. It is the shuttle bus you have taken to the terminal to pick up the passengers at an airport. Boys, if you have envied the bus drivers for expertly handling the large vehicle, this is your chance to check out your skills at driving a shuttle bus. This role calls for finesse and responsibility, as you negotiate turns, veer clear of side walls, avoid flight paths and reach your destination.

The shuttle bus has to be steered using the arrow keys and the spacebar has to be used for braking. The bus has to be parked at the designated place marked by yellow diagonal stripes.

School Bus Driver: A school bus driver on the first day of his job who has to pick up children from a designated stop. You step into the shoes of the novice driver as you embark on the journey to school. Easy as the task seems, you will soon know the skill required to accomplish the task can only come through practice. Negotiating the turns, the traffic, the signals require a high degree of agility and alertness.

The arrow keys are to be used to move the vehicle, the space bar acts as the brake and the bus has to be parked at the highlighted parking spot.

NYPD Crime Control: The super cop who wipes out crime from his range; if that is who you wanted to be this game is definitely for you. Armed with a mouse, the left click and the space bar to reload ammo...you are ready to take on the murky world of crime. The first level is at the shooting range where your shooting skills are honed. Once you pass this level you are deputized to virtually real crime scenes-the dockyard, the bank and more. You have to point and shoot down the criminals and avoid being shot at, you need to be real fast.

This game is sure to have you hooked till the sixth and final level.
