Contact Lenses Will Not Hamper Your Overall Appearance by [Julia Roger](#)

Article published on June 8th 2012 | [Health](#)

A contact lens is a lens that is placed in the eye. These medical devices are worn to correct vision. The reasons can be cosmetic or therapeutic. Do you care about your external appearance? If so, you can seriously consider this option if you feel that wearing glasses can hamper your overall outlook. This is a fast growing product. In the year 2004, the number of people wearing these lenses stood at 125 million worldwide. By 2010, the market for such lenses was \$6.1 billion. Estimates have shown that by the year 2015, the market will reach a staggering \$11.7.

Leonardo Da Vinci can be credited to have introduced the idea of Contact lenses as early as the year 1508. However, as time went by more work has been done on these lenses to make them user friendly. If you are suffering from aesthetics and cosmetics then you can opt for these special lenses. If you compare it with normal spectacles, you will realize that they provide better peripheral vision. The other advantage is that there is no accumulation of moisture in a form of rain, sweat, or snow. Therefore, if you are a sports person this is ideal for you. In fact, if you are suffering from keratoconus or aniseikonia, these will serve the purpose better than normal glasses.

These lenses can be divided into various types. If you have the desire to improve vision you must opt for corrective contact lenses. Cosmetic contact lens is designed to change the appearance of the eye. If you need to wear soft lens you can opt for therapeutic ones. However, before you order one you must seek the eye surgeon's advice on whether you really need one. You must remember that the eye is precious and you must tread carefully.
