Englewood Dentist Offers the Latest in Cosmetic and Implant Dentistry by [New Jersey Dentist](#)

Article published on May 15th 2012 | [Health](#)

Dr. Arnold Perman welcomes the community to his state-of-the-art facility located in Englewood Cliffs NJ where he works with patients on a personal level to facilitate the best results possible! Dr. Perman has more than 25 years of experience in art of cosmetic dentistry and uses the most advanced tools and technology. Dr. Perman is teamed up with world class ceramists and technicians who ensure every aspect of every case is handled meticulously ensuring 100% satisfaction. Various cosmetic dental procedures implemented including Dental Veneers, Custom Tooth-Colored Fillings, Porcelain Crowns, Inlays and Onlays, Dental Implants, Teeth Whitening, as well as Dental Bonding.

Dental Veneers-Porcelain Dental Veneers are one of the best ways to reshape and redesign your entire mouth. A very thin ceramic shell is adhered to your existing tooth structure to provide a glamorous cosmetic result that will conceal stains, cracks, misaligned teeth, spaces and chips.

White/Tooth-Colored Fillings-Tooth-Colored fillings are an excellent way to improve the overall aesthetics of your teeth. We remove old unsightly silver amalgam fillings and replace them with custom white fillings that match the shade of your teeth. The result is natural looking teeth and with no trace of a filling ever having been placed!

Dental Implants-Dental implants are the golden standard when it comes to replacing missing teeth. Implants are replacement teeth that will look and feel just like your own!

All Porcelain Crowns-All porcelain crowns are the best option when it comes to matching the natural color of your teeth. They are ideal for front teeth and a great option for those who are allergic to metals.

Teeth Whitening-We offer various teeth-whitening options to best suit your desired time-frame and budget ranging from one hour-whitening to custom bleaching trays.

Dental Bonding-Tooth bonding is a great way to cover up stains or discolorations on the tooth-surface. Bonding is also a means to conceal cracks or fill spaces between teeth.

Give the office a call at (201) 944-1969 to schedule a complimentary consultation to see how Dr. Perman can help you achieve the smile of your dreams!
