The name of Hydroxatone is very popular in the anti aging creams category of cosmetic products today. Apart from this there are several other competing products that are marketed aggressively with attractive offers and schemes. However, they fail to produce the anticipated results. This is the reason why many women in the US and Canada started turning to Hydroxatone as it is one lotion that offers total skin hydration & protection and reduction in look of wrinkles.

Co-formulated by a famed cosmetic surgeon, Hydroxatone is a total skin care system resulting out of years of intense research. With a remarkable blend of advanced ingredients that effectively erase the look of wrinkles and prevent formation of new wrinkles, this product is a huge success.

### Ingredients Weave the Magic of Hydroxatone

When the skin's ability to produce a protein called collagen decreases, there is a consequent loss of elasticity and dryness occurs. A steady production of collagen is considered necessary for the firmness, smoothness, and elasticity of the skin. The defining trait of Hydroxatone as an anti-wrinkle solution is that it contains constituents that help promote collagen production leading to a youthful, tight and rejuvenating skin.

A number of advanced ingredients work together to create a winning wrinkle control formula:

• Argireline: Hydroxatone contain this anti aging peptide that works to smoothen skin by minimizing the depth of fine lines. It also helps relax muscle fibers diminishing the look of wrinkles. Even surface wrinkles take on a minimized appearance upon regular usage of this constituent.

• Matrixyl 3000: This is the key component that promotes collagen production. Increased production of collagen helps decrease the visibility of crow's feet and wrinkles and also helps promote natural levels of Hyaluronic Acid and Fibronectin production.

• Hyaluronic Acid: The ability of this ingredient in retaining moisture effectively compared to other natural substances is all too well known to dermatologists. Better hydration leads to smoother skin with barely noticeable wrinkles.

### Clinical Trials Bear out the Success of Hydroxatone

Various independent studies and clinical trials have consistently proved the lasting results produced by this wrinkle formulation. A surprising hundred percent of trial participants concurred that Hydroxatone boosts the overall appearance of the skin. 91 percent users were delighted to experience a new glow and radiance on their skin while 97 percent agreed that this product betters the smoothness and texture of facial skin. Given these facts any talk of Hydroxatone scam appears untenable.
