Article published on December 1st 2011 | Health

Eyes are an important organ that helps us to see this beautiful world. Any problem or disorder can be harmful and can cause deformity in them. Eyes are most delicate as well as the most precious organ of our body. Ophthalmology is a branch of science that deals with the disorders of eyes. It deals with the medical and surgical eye problems. In this branch, operations are also performed on the eyes. Ophthalmology 3d medical illustration is helpful in describing more about the problem. These illustrations provide information about eye disorders, their symptoms and preventions etc. in a very informative manner which is quite easy to grasp for everyone.

The word ophthalmology comes from the Greek word opthalmos which means eye and logo means thought. So opthalmolology means the science of eyes.

Ophthalmology deals either with certain diseases or disorders of certain parts of the eye. These are:

â€¢ Glaucoma

â€¢ Cataract

â€¢ Cornea

â€¢ Anterior segment surgery

â€¢ Medical retina: in this retinal problems are treated without surgical means

â€¢ Neuro- ophthalmology

â€¢ Refractive surgery

â€¢ Ocular oncology

â€¢ Pediatric ophthalmology that deals with the mis- alignment of the eye

Different kinds of eye problems can affect your eyes and are treated with different means. Common eye problems like poor eyesight, glaucoma, swollen eyes, twitching etc. letâ€™s take a look over some common eye problems.

â€¢ Twitching: twitching or itching is a very common eye problem and almost everyone got affected from this. Excessive caffeine consumption, fatigue, stress and anxiety attack leads to this problem. It may also occur because of the irritants in the eyes. It may also occur due to some eye syndromes like pink eye syndrome and dry eye syndrome. Allergy can also cause itching in eyes.

â€¢ Eye problems related with age: the eye muscles becomes weak with age, that leads to several age related problems, although most of the age related problems are treatable now a days.

â€¢ Blurry vision: if anyone face spots in front of the eyes then it may lead to some serious health problems Such as diabetes, stroke etc. blurry vision can also be caused by stress, fatigue etc. if anyone suffer from any problem in his eyes then definitely he needs medical attention. Blurry vision is usually caused by glaucoma, migraine etc. and can be corrected by using lenses or glasses. This

problem can also be treated with the help of medications.
