Do you know how to sleep well without lying on the bed for seven to eight hours at a stretch? If not, then you surely haven't heard of uberman schedule or uberman sleeping schedule. Though sleeping to common people means a long and uninterrupted process of rest that they take every night, there are several sleeping patterns. Seven-eight hours at a stretch is the most common sleeping pattern and it is called monophasic sleeping since there is no break in the midway. Another pattern is biphasic sleeping where a person sleeps in two phases in a 24 hour cycle. The third and the most interesting pattern is polyphasic sleeping which refers to sleeping in multiple phases. Uberman schedule is a form of polyphasic sleeping and is ideal for people who cannot afford to sleep for seven to eight hours at a stretch daily. For them, it is very essential to know how to sleep well without wasting much time.
