Testoviron Depot by Schering by Smith

Article published on January 10th 2012 | Health

Testoviron Depot is the most popular form of Testosterone Enanthate. Testosterone Enanthate by Schering, Pakistan is an injectable steroid which contains 250mg per ML of the hormone Testosterone Enathate.

Testosterone Enanthate ester makes its release into slow and therefore is requires injections to be less frequent than they would be if a bodybuilder using Propionate. Athletes using Testosterone Enanthate often find that a twice weekly injection schedule, such as Monday/Thursday, is very sufficient for maintaining steady blood levels of the hormone.

Testosterone is the most common anabolic hormone that there is and is also considered the most basic. Due to this, bodybuilders often consider it the base steroid to most all cycles. Testosterone is both anabolic and androgenic in nature. Users of Testosterone Enanthate will notice a dramatic gain in muscle size and strength, as well as an overall sense of well being and increases libido and sex drive.

Testosterone aromatizes very easily and therefore estrogen buildup and side effects can become an issue for users sensitive to these problems or those choosing to use a high dose of this compound. Therefore, when using Testosterone, bodybuilders often choose in incorporate an anti-estrogen such as Anastrozole, Proviron, Tamoxifen to help keep estrogen related side effects to a minimum. Extremely sensitive users, or users using very high doses (800-1200mgs) might find that stronger anti-estrogens such as Letrozole or Exemestane are more suitable. Androgenic side effects such as oily skin are also possible while taking Testosterone.

Testoviron depot is an all-purpose steroid which is preferred by many body builders and athletes because of its amazing properties. testoviron depot is highly effective in increasing muscle weight and you can also obtain enormous strength gains with this steroid. testoviron depot is used by body builders and athletes in all stages of training. It boosts stamina and shortens the recovery time one often requires after hours of strenuous exercises.

Being an anabolic steroid testoviron depot promotes lean muscle mass, strength gain and stamina but also has some serious side effects. First of all the muscle mass gain and strength gain reduce considerably when you stop taking testoviron depot.

Testoviron Depot may cause serious problems of skin and scalp. The skin turns oily and in the worst case the user may develop steroid acne. Steroid acne is quite painful and is spread on a wider area on the neck, shoulders and back. It also occurs on the face. It leaves deep scars on the skin. Steroid acne occurs because testoviron depot stimulates the sebaceous gland which secretes an oily film sebum. Excess of sebum comes out on the surface of the skin in the form of acne. Steroid acne also commonly occurs in men.
