Article published on April 19th 2012 | Health

Oxygen concentrator is an external device which provides oxygen to a person, minimally at higher concentration than available in the natural air. They are a convenient alternative of the oxygen tanks. They are also used as a source of oxygen in industrial processes. These devices produce one to five liters of oxygen per minute. They use the pulse flow to deliver oxygen when a person inhales. They are also used in cases of other respiratory diseases. They are plugged into an external socket and they can also be attached in the car. They are also used by the military to provide oxygen to air crew at high altitudes. Most of them run on electric batteries. They are far safe as compared to the oxygen cylinders. They are very important in situations where oxygen cylinders cannot be used. They are prescription items given for their home.

Portable oxygen concentrator gives a patient new life. They make the life easier and better. Portable oxygen unit gives any patient freedom to pursue and enjoy life. It is similar to home oxygen concentrator, but is smaller in size and easy to carry around. These concentrators make it convenient for a patient to travel easily without any worry. They are FAA-approved and are safe to use.

Lifechoice have come out with their own lifechoice portable oxygen concentrator. These concentrators give the patient new freedom and choice to do a number of things. It is the ideal oxygen therapy for active patients. They are to be designed patient-friendly. Portable and easy to keep and carry and it weighs around 4.9 lbs and is easy to carry around anywhere. No cart is required as there is 4-way carry case which can be used as back pack. This reduces the extra baggage. They work on Breath Auto Mode Technology which automatically adjusts the oxygen demand. They are easy to operate. The battery life is more as compared to other oxygen concentrator devices. The life of lifechoice oxygen concentrator is over 5 hours. Also, additional batteries are provided for extra use and emergencies. They come with AC/DC power adapters.

As mentioned earlier, since these concentrators are FAA approved, they are safe to use. With every concentrator, an accessory bag, batteries, carry case, and adapters are provided for and they come with a 3-year guarantee.These concentrators are very beneficial and important for the regular patients who require more oxygen. They are also used by military personnel's, trekkers, etc... They are easy to carry and use and do not require much of external care. They are an advanced form of concentrators and are considered blessing in disguise for the patients!!
