Organizing the space in your kitchen you fight for every inch of free space especially if it is limited. The wine bottles however may occupy several cabinets and drawers of your kitchen making it almost impossible to use for other needs. In such a moment you come to a conclusion that you need something able to organize your collection of wine clearing the space of bottles and glasses and wine accessories.

Before making a choice and browsing the global net for the item state clear what you need. It means you should determine how many bottles you will keep, how often you will use the bottles and how much space in your room you can single to fix the rack.

The modern wine market offers a wide choice of racks suiting every fancy. All the racks can be relatively divided into two parts. One part presents functionality. These racks are made of firm materials being metal and wood. These are stable constructions with high capacity. They are suitable however the wine racks do not have a fine look. In most cases the racks do not perform aesthetic function as their strong point is durability, functionality and usability. In most cases you can store up to 60 bottles of wine of different size and shape in a rack.

Another part presents exquisite style and design immolating the functionality and durability. These are always of fine materials ideally fitting the environment. However such wine racks serve mostly as decorative means rather than a functional rack.

However there is a perfect solution performing the combination of style and functionality. They are comparatively small and do not require much space in your kitchen, bar area or living room. Once mounted, it will perform the safe and secure keeping of your wine collection.

However what are the main functions the wine rack should perform. First and most important function is safety and security. Pay attention to the way the rack is fixed and the wines in it are kept. Each bottle is a heavy object and if the rack is mounted on the wall or a ceiling the fixing should be firm and secure in order to avoid breaking the collection.

Another important function of the wine rack is saving your space. Some of them are assembled on the wall, some are hung on the ceiling, other ones are standing on the floor. Buy an appropriate wine rack considering you needs and fancies. If you need to save space and keep a large amount of wine bottles it is better to choose stable metal constructions with safe frame. The more bottles you are going to keep in one place take care of the display of them in the rack. If you are going to use them frequently you may choose some kinds of metal wine racks performing a metal construction keeping the bottles angle wise in several stores. They are convenient and usable however the customers claim the bottles being set too close to each other and it being almost impossible to take out a bottle without damaging another bottle. These racks can be joined and perform a single unit holding up to one hundred twenty bottles at once!

The most aesthetic look performs the wine storage cabinets suiting every fancy and style. You can choose different wooden sizes and shapes. Such racks are holding up to sixteen bottles and all the accessories being a perfect completion to any interior. It will help to manage your collection giving each bottle a separate place. Such cabinets provide a separate rack for long stem glasses being suitably at hand when you are going to take a portion of a delicious wine. These racks are nice however occupy a lot of space and be stylish add-ons however performing poor functionality.

The most popular household solutions for daily usage are however wall wine racks. They are intended to hold up to nine bottles, are easy to assemble and fix and do not require special maintenance and care. Another kinds of such racks are hanging wine racks fixing on the wall of the ceiling and performing fixed spirals holding up to two bottles in the laps of each spiral. From the first glance the construction may seem unstable and shaky. In fact they are shaky and you need to hold another bottle taking one off the lap!

If you are going to store some more than ten bottles you may find suitable wooden wine racks which can be added with new racks any time you need more space to keep your collection. The main advantage of suck kind of racks is that you can shape and size it as you wish making higher or wider depending a way you will add new parts.

And the last advice you may find useful! Being a wine sophisticate, take care of proper storage of your collection. You may use some wines frequently, and some bottles will wait for years for their special occasion. The wines are better saved in the cellar cork down in the dark. If you collection is constantly growing and you are lack of racks, or you have equipped your cellar and bar area with proper units take care of appropriate wine crates to keep and carry the bottles. They are equipped with suitable handles made right in the sides of the crates. The wood the crates are made of is well sanded. Such crates will provide you secure transportation of wine bottles in your cellar and out and keep some of them.

Whatever your needs and fancies you can always buy a proper wine rack or order it online checking the reviews of the experienced customers and getting the most profitable deal as you will get the highest quality of the product at a fairly price!
