Buy a Double Memory Foam Mattress by Sean

Article published on December 8th 2011 | Home Improvement

No matter what size memory foam mattress youâ€™re looking to purchase, you wonâ€™t find a bigger and better selection than the one at Zleeps. You can buy a double memory foam mattress or if youâ€™re in the market for something larger, king and super king sizes are available. Alternatively, you can also buy a single mattress from our range.

If youâ€™ve yet to experience the great comfort and support that a memory foam mattress offers then let us assure you that it really is quite special. Quite simply, this is the most luxurious style of mattress ever designed and it gives you the best possible chance of achieving a restful nightâ€™s sleep.

Memory foam works because the upper layers of material become flexible as soon as you lay down on them. In turn, they start to mould around your body and memorise its individual shape. In the meantime, the layers underneath remain completely solid and this gives you that great combination of supreme comfort and total support that youâ€™ve been hearing about.

If youâ€™re looking to buy a double memory foam mattress, you can understand how its design can benefit both you and your partner. Maybe youâ€™ve argued over mattresses in the past and one of you has had to compromise with an uncomfortable sleeping surface that doesnâ€™t suit their body. Perhaps youâ€™ve had sleepless nights or have even experienced back pain as a result.

When you buy a double memory foam mattress however, it adapts to each of you individually so that neither one of you has to tolerate an uncomfortable sleeping surface ever again. If you are suffering from back problems, this style of mattress will give you the best possible support in the night while giving you all the comfort you need to achieve restful sleep.

There are more health benefits besides because memory foam is completely hypo allergenic which means, amongst other things, that it will keep dust mites at bay. The absence of springs in the design is a useful safety feature too and you would be amazed at the number of injuries that are caused by faulty or protruding bed springs.

We firmly believe that you wonâ€™t find a better mattress at a more competitive price. No matter what size or style you are looking for, we have it here and with four ranges starting with bronze and leading up to platinum, we also have prices to suit all budgets.

Remember to keep checking our online website as offers and promotions change on a regular basis and remember too that free UK delivery is included in the prices shown.
