Article published on March 1st 2012 | Home Improvement

Nowadays, swimming pool is fairly common and is available in many houses especially in cities where people are used to get into it for making their body loosens up. People are found to be addicted to it but most drastically, they make a mistake by not cleaning the pool filters on regular basis. So friend, if you are of the people who has not think of it before, in that case let me tell you that you need to keep doing it on certain time period which will lead you to better health. For your kind information â€“ apart from pool filters, pool and spa chemicals could happen to be your option but if you prefer pool filters than any, then let me guide you how you can clean the fitter to make it well equipped device for pool maintenance. Follow the guidelines to clean cartridge type swimming pool filter from below.

How you can clean swimming pool filter?

â€¢ First of all take out cartridge from the pump-filter assembly

â€¢ And spray nozzle before the filter dries when you have removed it

â€¢ Then dry the filter thoroughly and then use air compressor to eradicate loose particles from the filterâ€™s fabric

â€¢ And after that prepare a large bucket with a tight-fitting lid to soak your swimming pool filters and then keep it for few hours then rinse in a bucket of clean water for cleaning and then dry it again in bright sunlight

â€¢ After that put into a solution of muriatic acid and water to properly remove minerals that accumulate in the filter media and then keep it within until the acid solution quits bubbling and after that you need to ensure that it stays for few more hours;
