Slate Roofing for Extraordinary Quality and Structural Durability

by Gyteno Smith

Article published on January 4th 2012 | Home Improvement

Everyone wants their home to be perfectly stylish and an ideal blend of uniqueness and functionality. In order to provide that exceptional and inspiring uniqueness to their homes, architects and engineers prefer high-quality slate and metal roofing for the homes. It not only gives extra durability but also provides that luxurious sheen to the house. These two types of roofing systems are highly-popular because of their long-term durability and earth-friendly features.

For homeowners, slate roofing is the finest option available. It substantially gives a distinctiveness and aesthetically pleasing presentation to the house structure, making it perfect in terms of looks. In fact, the beauty of natural earth component when combined with adorable craftsmanship in application yields in the formidable and inspiring architectural elegance. Unlike other roofing materials, slate roofing includes the high-quality of every single piece being unique - no two pieces of slate are exactly same. It also offers the apparent advantages including, but limited to, reliability, durability, zero-maintenance, earth-friendly, non-absorbent surface as well as stain-free surface.

However, due to rapid transformation in the construction sectors, it is possible to select different types of styles and designs as per the house theme and personal tastes. Slate is also regarded as a weather-proof stone that is available in a broad variety of colors and gradations. Slate shingles are one of the finest and durable roofing options in terms of service life. It can last longer, depending upon the quality, applicability, and design construction of the stone. It is heavy in nature and therefore, resistant to high winds.

Slate is often preferred in the shades of gray, black and dark red, depending on which quarry the stone comes from. Most of the roofing manufacturers offer standard slate sizes, distinctive sizes specially made to the pre-defined specifications in order to match the preference and style. Manufacturers can mix and match colors for a mottling effect. Weathering and semi-weathering slates also change color with age, so your roof will develop a unique patina.

Slate shingle installation needs a solid deck with the proper framing. Most of the modern homes meet the basic structural standards for slate roof installation. If you are looking for distinguished and most exciting roofing for your remodeling project, then you must consider slate roofing. Also, you must consider the experienced company that can understand and interpret your needs and offer a perfect blend of superior solution for your roofing requirements.
