Hardwood Flooring- Maintaining and Cleaning by Mariana Nikki

Article published on December 22nd 2011 | Interior Design

If you properly maintained your hardwood flooring it can last for a long time. Hardwood floors needs a less maintenance requirement and can last a lifetime. Maintaining of Hard wood flooring only requires a regular cleaning, keeping it dry and avoiding the entire insensitive element. You must have to care about the moisture. Moisture is not good for your hardwood floor and cause damage. You must take properly care of bathrooms and kitchens and any other wet rooms water can come and cause damage to the hardwood flooring. If water is stand in hardwood floor you must have to clean it and dried it quickly. If water is stand for long time it can cause the damage to hard wood floor.Now the finishing of the hard wood floor is easy to maintain. The best way to maintain the hard wood floor is to keep the door mats at ever entrance so the less particles of dust will come inside.

You can also put rugs on the hard wood floors it gives a nice look and also minimize the wear. If you are putting the rugs on hardwood floors itâ€™s important to move them time to time to provide light exposure and oxygen to the hardwood floors. One important thing is to not move your furniture directly on the floor it can cause scratches. You can also place cork pads under your furniture it will prevent the scratches or marks. The color of hardwood flooring can be damaged with the direct sun light so itâ€™s important to use curtains and blinds. The curtains and blinds must be kept drawn to prevent discolor from the direct sunlight. It is very important for you to give a proper care to you hardwood floor. Maintaining of hardwood flooring is very easy and problem free. Cleaning of hardwood flooring is very important. Proper cleaning of hardwood floor can increase its value and durability.

You must know about the rules of cleaning the hardwood floors. Avoid water for cleaning it will damage your hardwood floor. If the water is stand somewhere you must have to clean it without delay. If the water stands for a long time it can causes the finish to split and your floors to enfold and cup. You can use hardwood floors in your bathrooms, kitchens and laundry but they need extra care. For cleaning your hardwood floor use a soft, fine spine broom to brush and remove dust and stones. The dust and stones can also be placing the mats and rugs at doors. If you want to vacuum your hardwood floor, you can but use a soft brush as an attachment. You can vacuum your hardwood floor twice a week. After vacuum the floor you can also use damp mop for wiping the hardwood floor. A damp mob should be moist not a soaked with water. Donâ€™t use any type of oil soaps because they leave a deposit on the floor. Now there are many Natural pH based wood floor cleanser available you can use them.
