Article published on January 30th 2012 | Interior Design

While most people enjoy the finished product, very few individuals enjoy the process of decorating or painting a room. You can even decorate for fun. Well, have you ever heard of wall decals? Wall decals, which are also commonly referred to as vinyl wall art, are easy to install and will not harm your walls. Once installed, the end result is the appearance of a high-end mural or poster.

Wall decals are a fun and creative way to make a house to look and feel like a home, a classroom to feel and look like a secure and learning environment, and a child's bedroom look like a fun, but comfortable environment.

Wall decals can be purchased from major online retailers, specialty shops, or directly from some interior designers. Since specialty design shops focus entirely on producing vinyl wall decals, ordering directly from these types of stores will normally result in the lowest cost. In addition, only the specialty shops that actually manufacture wall decals will be able to customize an order to meet your exact specifications.

When it comes to purchasing a wall decal, a few simple steps will make the process more enjoyable and ensure the success of the overall project. To start with, locate the area of your home that you would like to install the wall decal. Next, it is important to measure the available wall space and notice what colors would work well in the space. Now, it is time to pick the style of wall decal. Some popular styles include: nursery wall decals, monogram wall decals, modern wall decals, and tree wall decals. Also, sometimes contacting a specialty store directly will result in the best price and great advice.

Prior to buying wall decals, please be aware they can be very addictive and can turn into a habit, but the bright side is your home will get a facelift!
