Article published on November 25th 2011 | Interior Design

When looking to add those delightful finishing touches to your interior home dÃ©cor, wall sconces provide you with affordable and highly attractive solutions. Not only do they offer you welcome opportunities to draw specific attention to wall mounted mirrors, photographs, pictures, and other pieces of ornamentation that you wish to highlight. Wall sconces also contribute to the overall ambience of your rooms, supplementing your main lighting fixtures, and bringing a cosy glow to shady corners and crevices.

Furthermore, wall sconces serve far higher purposes than simply acting as accent pieces. They undoubtedly add companion decorative lighting in your main living areas, yet they are also more than capable of standing alone in smaller areas where bright lighting might not be as pertinent as it is to your lounge or kitchen. Wall sconces play decorative and practical roles in your bathrooms, bedrooms, hallways and home offices.

ADA wall sconces rank highly amongst the most diverse and popular ranges on the market. They are available in a broad variety of different connotations, finishes and price points, ensuring that something for every space in every home is truly catered for. Their one light wall sconces range in design from the ultra contemporary and minimalist, to highly traditional and period styles. There are very few things that you cannot do with them when it comes to both decorating and lighting your home.

Many ADA wall sconces are conveniently multitasking, as they can be wall mounted and fitted either horizontally or vertically. You might choose to fit one horizontally above a shelf of plants in your lounge, or large potted freestanding plants can be transformed in to very beautiful focal points when flanked on each side by a pair of vertically fitted wall sconces. Likewise, you may like the idea of supplementing your main bathroom lighting with horizontal or vertical wall sconces near your medicine cabinet or a mirror. This equates to more than supplementary lighting, as it also means that you do not have to endure the glare of your main bathroom lighting when visiting your bathroom in the middle of the night.

When seeking out fittings and fixtures that are as unique as your own personal tastes, you might look no further than wall scones that have four, five or six lights. These, of course, provide substantially more light than single wall sconces, making them exceptionally well suited to many different spots in your rooms. Just like their one light equivalents, they are available in antiquated and modern styles, in various satin nickel, wooden and wrought iron finishes.

Crescent Harbor Lighting has so many wall sconces befitting so many different styles of home dÃ©cor that you will be literally spoilt for choice. Why settle for darkness when it can provide you with the stylish home lighting you want and need for your home.
