How to do a large File Transfer at a small price? by [Emil](#)

Article published on July 27th 2012 | [Internet](#)

Most of us do not know how to transfer large files. You might have the video or presentation, but you cannot share it, unless you meet in person or burn it on a DVD and send by express couriers. The time and money consumes in the whole process is pretty huge and becomes a concern if you need to do it repeatedly. Another option available is FTP, but as you know it might not be safer as others may get a hand on your data. But there is a quick solution to this dire problem.

An internet service allows you seamlessly to transfer large files, this is possible, and many are availing the service including business enterprises. There are subtle reasons to opt for these services, as these are the only practical means to send big files. You can upload your file on the server and your friends can download the file on their computers. You can be rest assured as all these transfers are done with 128 bit secured encryption. In fact, you can also choose from many other options available to you. Getting notified by email, once the download is complete is a nice idea, which frees you from other chores. Storing files on a secure server gives complete peace of mind.

These are many advantages of the system; however people do not utilize it due to ignorance. Facilities such as activity tracking, where you attain complete control on the activities pertaining to your file uploaded on server are now possible. It becomes highly advantageous, when you deal with highly sensitive data in cohesive environments. Even you get notified on delivery of download URL to the recipient. Complete edge over control on what is happening is a secure feeling.

The answer is a big no, if the question about the tough process it takes to start the transfer process. All you need is your file to be sent and the internet connection. You can register free and begin uploading you files within a few seconds of registration. Of course, if you are planning to do it in a big way, you can look for many available options which are solely designed to cater to huge requirements and multiple users environments. Transfer of largefiles is not a herculean task anymore. You can be rest assured with complete peace of mind and proficiency in your task of transferring.
