More Money, More Options by [Jamshaid Hashmi](#)

Article published on April 11th 2012 | [Internet Business](#)

A WSI franchise represents much more than just another job – it represents a totally new set of options you™ll have once you get started. In a traditional employment arrangement, you™d be surprised at just how many of your options are dictated by your employer.

When you™re working for someone else, they dictate:

Your vacation time! Sick days! Bereavement or maternity leave! And, of course, how much money you make!

Sure, there™s flexibility built into any traditional employment system, but the fact is that they have an extensive amount of control over how you live your life. It doesn™t have to be that way, and with a WSI franchise, you™ll not only have more control over when and where you can do these things, but you™ll also have the money to make the most of your new options.

Self-employment Benefits

Self-employed business owners who get past the one- to three-year start-up mark for their new business report increased revenues over their old employment situation, and having a more direct ability to control where the money goes means less worrying.

Consider that staple of the employment world, the holiday bonus. Many people plan their year around the bonus, only to find out when times get tough that the bonuses have been cut or eliminated altogether. When you have your thumb on the books, you have more control over the revenue stream, and can make realistic plans that aren™t determined by someone you most likely will never meet.

So if you want a career that lets you control more of your life and more of your money, consider starting your own business with a WSI franchise. More opportunities and more options await you when you have control over how you work and how much money you make doing that work, and the sooner you begin, the sooner you can see just what chances are out there.
