RHCE Certification & Training in Hyderabad by David Raju

Article published on May 30th 2012 | Language

An RHCE certification is earned by an RHCSA who has demonstrated the knowledge, skill, and ability required of senior system administrators for Red Hat Enterprise Linux systems.

Those looking to enhance their IT career, should take Red Hat Certified Engineer (RHCE) training course that will teach them all they need to know in order to become a successful IT professional. The RHCE is a performance-based test that measures actual competency on live systems and often considered "the crown jewel of Linux certificationsâ€•. Red Hat Certified Engineer, RHCE training course will help you demonstrate your ability to configure networking services and security on servers running a Red Hat OS.

The self-study Red Hat Certified Engineer (RHCE) web based training (WBT) course will give you an introduction and then teach you how to install on Intel Architecture; basic configuration and administration; advanced installation; advanced configuration; X Window System; standard networking service; and systems administration and security. The course is taught by certified instructors who have years upon years of experience in the IT industry and who will pass down all this knowledge down to you in the form of full-motion videos, containing informative learning methods that will help you learn faster and retain the information longer. The Red Hat Certified Engineer (RHCE) training course delivers the technical curriculum in an exciting, interactive format. You will participate in a variety of multimedia content, including in-depth discussions, interactive demos, animations, quizzes and assessments to track and monitor your progress and step-by-step instructions detailing how to work with the program

In this course, they offered, practical, hands-on training programmes, their classes are conducted in labs, where each participant has a system to himself. They expect participants to learn by practically configuring services/applications while our faculty closely monitors them. Progress of a participant is not measured by the number of training hours that he has completed, but by the skill-sets he has acquired. To ensure what is taught has been understood and practiced, the pace of the training may be altered as per requirement, and participants are encouraged to spend additional time practicing. They also encourage participants to join our forums, where they can share a problem and get support. In addition to Red Hat training program, they also provide customized trainings for institutions, corporates and government organizations.

Course content summary:

â€¢ Package management

â€¢ Network management

â€¢ Storage management

â€¢ Account and authentication management

â€¢ Installation, Kickstart, and virtualization

â€¢ SELinux and firewall management
