Article published on July 11th 2012 | Management

Business owners get the benefit of Payment Transaction System in the form of electronic payments. It helps the businesses to accept the payment through Visa, Master Card, American express, Discover, JCB, Fleet Cards, Debit cards and ACH â€˜s from the customers whenever there is a need for any transaction. These methods are safe as well as efficient enough. Accurate and integral service is also provided to the business customers so that they could be able to execute the electronic transactions in the form of Cash Advance, Electronic Gift Cards, recheck and Check Guarantee services.

Payment transaction system also provides the service for all kinds of payment processing needs. The application processing has been made flexible so that it could meet the requirements of all kinds of businesses and it does not depend on the size of business. Whether the company operates as a single outlet or has multiple outlets, Payment transaction system can offer the best service in all the forms. The accounts opened by business owners have no hidden fee and all the rates are communicated in advance and agreement of the client is always there. The funding process is fast and the payment is delivered on the next business day. The service is high class and the ranking given by the customers is top class due to friendly and receptive customer support which has been made possible with the expert staff available 24 hour a day. The rates offered are competitive, and the online reporting is available for the customersâ€™ convenience.

Through Payment Transaction system, the payment can be made anywhere anytime at the place where business activity is going on and the whole process offers high security and efficiency.

Payment Transaction System offers Petro Program which allows the payment and allows the client to save money on the merchant processing fee. The payment acceptance can be expanded by taking wright express and passage payments.

The debit card processing is made easy by the acceptance of PIN-based, PIN less and Signature-Based debit card processing which makes it easy for the customers to pay the amount simply by using credit cards. Access has been taken for all the Debit Networks such as Star, CU24, Cirrus, Pulse, Maestro, Shazam, NYCE, Interlink, etc.

Payment transaction system offers the facility of credit card payment gateways for online shopping center, virtual terminal for the payments to control the power of POS terminal on the PC, in house payment application etc. so everyone can be benefitted. In addition to most of the shopping carts available, Payment Transaction System has virtual assimilation with payment gateways such as Authorize.net, eprocessingnetwork.com, etc. credit card terminal can also be used in oneâ€™s mobile phone.

Now the technological advances have turned the paper gift certificates to the electronic gift certificates. This takes a little space in the customerâ€™s wallet and provides a reminder so that business could be visited. So it is beneficial to use the benefits of electronic gift cards for any business as they are efficient and effective.
