Retro Style Fridge Freezer – Comparison with the Actual 50s Refrigerators [by Julia Roger](#)

Article published on July 24th 2012 | [Marketing](#)

There are certain brands which have earned a massive reputation in the cooling industry. There are countless American refrigerators on which "Fridgidaire" appears. These days, a lot of people keep on asking about retro style fridge freezer. In fact, what actually are they? Do they have some different features? Do they feature varied looks? Why the name "retro" being tagged with these freezing units? In the next few lines, all these questions will be answered.

Any type of SMEG fridges has retro outlook. Forget about color shades, it is the design that makes these items unique in appearance. Although, they have the look of 50s, they are enriched with modern technologies and rich features. It is only the overall style and design pattern that resembles the 50s era. A black smeg fridge, with hinges on door sides, looks amazingly unique during these days. It is the overall design that determines opening of the door on which side – left or right.

During the 50s era, refrigerators did have freezer on top as well as a certain cooling section at the bottom. Each of these refrigerators featured stylishly curved corners on the top side. In fact, storing items at the top of these refrigerators were not done by users. Freezer section was normally used for collecting ice.

However, things have changed massively. These days, SMEG fridges have a much slimmer appearance. In fact, they look like those ice box which were used during the older days. But, they are more effective than those early 50s refrigerators being used. It is only the exterior look that resembles those retro eras, otherwise, functional features are totally modernized. The modern day retro style fridge freezer does feature for antibacterial interior. They are safer to use these days without any risk of short circuit.
