Article published on May 11th 2012 | [Mobile Phones](#)

The Latest Technology News featured in different magazines, channels, websites and newspapers has given a lot of exposure to the people and made them aware to the prevailing advancements in the market. With each passing day, there are various innovations that are taking place around us. The influx of advanced technologies and modern innovations has altered the way you communicate, travel, work and play. Check the latest news in IT industry, you will come to know that this is only the sector that does not remain stagnant. Things keep changing from time to time, be it the development of advanced mobile phones, launch of new gaming consoles, up-gradation of computing devices & laptops and designing new software & applications. Moreover, the modern technologies are fun to use and tempt you to have more.

With the innovation in the telecommunication sector; latest and upgraded versions of mobile phones have captured a huge market. The rising fame of new smartphones has made the generation next crazy, who desire to have one such phone in their hands. Samsung, Nokia, BlackBerry, Apple, HTC, Sony or any other mobile manufacturing firm, everyone is striving to bring best smartphone loaded with advanced features & applications for the consumers. Presently, mobile phones like iPhone 4S, Samsung Galaxy S III, Nokia Lumia, HTC Wildfire, Sony Xperia series, BlackBerry Curve 9320 are in the top list among the tech-freaks. These smartphones are featured with newer version of OS, highly effective touchscreen, QWERTY keypad, powerful processors, huge storage capacity, excellent battery backup, GPRS/NFC/EDGE connectivity and GPS enabled system.

It feels amazing to explore the newer technologies available and fun to know that things we dreamt of are now happening in real. We do feel that little thrill when we discover various unbelievable science fictions taking place in the movies now can be experienced by us in real world. There are certain applications and software available in the markets that allow us to perform various functions & tasks. Now we have the access to applications like Fring, Skype, MobileVoip and Viber that facilitate us in communicating virtually with our friends, relatives & colleagues online through mobile phones. Talking about modern innovations, it's in the news that Sony has launched two new Android based LTE smartphones, Xperia GX and Xperia SX in Japan, which might hit the Indian market soon. With 13 megapixel camera and 4.6 inch HD screen, Xperia GX will be a favorite among the people in India. While Xperia SX features 8 megapixel camera and 3.7 inch screen, it also has 8GB of internal flash storage. Both phones will run on Google's newer version of OS, Android 4.0 (Ice Cream Sandwich).

It was the time when people used to describe television as an Idiot Box. But as the time changed and with latest inventions, Smart TVs that are slim, stylish and loaded with advanced features have taken place of those conventional televisions. Lenova has launched its new 55-inch LED flat-screen Smart TV, which likewise other Smart TVs can connect to internet and allow users to download games, songs, movies and chat with their relatives via Skype. Further, This LED uses Qualcomm Inc. processor and operates on Android 4.0 operating system. According to the Latest Technology Reviews, Lenova's K91 Smart TV will definitely give a tough competition to other flat-screen television makers.
