Apple is the globally famous mobile phone brand. A lot many cell phone users wait for the upgraded versions of Apple's mobile gadgets. Both Apple iPhone 4S and Apple iPhone 4 is really very famous in the market and many mobile phone users are looking forward to buy these handsets. But the point is which is better than the other. To solve such query it is really very important to compare Apple iPhone 4S vs Apple iPhone 4 carefully, so that you can pick the best one as per your needs and budget.

**Processor and Memory:** The iPhone 4 uses a processor of 1GHz A4 whereas, iPhone 4S has an A5 dual-core processor. The memory of iPhone 4 is 512 MB and iPhone 4S carries a memory of 1GB. This means Apple's iPhone 4S is superior in this category as compared to the iPhone 4.

**Graphics:** As far as graphics of both phones are concerned, Power VR SGX 535 is the graphics used in Apple's iPhone 4 device. The iPhone 4S phone uses the graphics of Power VR SGX543MP2. This means iPhone 4S is having a better graphics than the iPhone 4.

**Storage Capacity:** Both Apple iPhone 4 and iPhone 4S is having the internal storage capacity of 16 GB and by using a microSD card slot the memory of iPhone 4 can be expanded up to 32 GB and the memory of iPhone 4S can be expandable up to 64 GB.

**Camera and Video:** The camera of iPhone 4S wins here as it has a powerful 8 mega pixel camera, whereas iPhone 4 contains a camera of 5 mega pixels. With iPhone 4 you can records video at 720p with 0.3MP front camera. On the other hand, with iPhone 4S a video can be recorded at 1080p, with 0.3MP front camera.

**Radio:** Apple iPhone 4 uses Quad-band GSM or CDMA. Whereas, Apple iPhone 4S uses GSM+CDMA.

**Download Speed:** HSDPA 14.4 Mbps down could the download speed of iPhone 4S and iPhone 4 has HSDPA.

**Colors:** Apple's iPhone 4S and iPhone 4 can be accessed in white and black color looks, which make both these handsets eye-catchy.

**Weight and Dimensions:** Apple iPhone 4 has 137 grams weights with dimensions of 115.2X58.6X9.3 mm. Conversely, Apple iPhone 4S weighs 140 grams and its dimensions are 115.2X58.6X9.3 mm.

Therefore, a comparison of both these Apple devices may help the users to find out which handset suits their desired needs and pockets. However, Apple's iPhone 4S is clear shot winner here.
