Article published on November 28th 2011 | Mobile Phones

Samsung mobile has now turned out to be the leading mobile maker company across the world. From last few years Samsung mobile is performing very well over the mobile market and has successfully scored the special position especially in Indian mobile market. The Galaxy series is one of the most popular series by Samsung. The company has announced the several handsets under this series with different specification with different prices in order to meet with the expense of all class buyers.

The company has released one more handset in this series, the Samsung Galaxy pop. It has a 3.2 inch capacitive touch screen mobile display and supports the 240 X 320 Pixels resolution. The phone is running on the Google Android v2.2 OS. It is an affordable price smart phone packed with brilliant features such as 3G, Wi-Fi and GPS along with the capacitive touch screen display. It has featured with the MP3 / WAV / EAAC+ Player with 3.5 Mm Audio Jack & DNSe Sound Enhancement and also come loaded with the Stereo FM Radio with RDS that doubles your entertainment.

When it comes to memory, the Samsung Galaxy pop supports the expandable storage memory up to 32 GB by using the micro SD card slot and comes with the inbuilt memory of 160 MB. The phone is loaded with all the advanced applications such as Digital Compass, SNS Integration, Organizer, Document Viewer/Editor, Image/Video Editor, Google Search, Maps, Gmail, YouTube, Calendar, Google Talk, Picasa Integration, and Voice Memo/Dial.

It is ideal mobile phone to buy by Samsung mobile and available in worthwhile and sensible price range. The Samsung Galaxy pop price in Delhi is near about Rs.8, 500. It is a complete package of features which will easily satisfy the demand of many consumers at once. This phone is equally demandable as used Samsung mobile. You can get the camera of 3.2 mega pixel which develops amazing quality pictures and comes with the Video Recording, QVGA@15fps. It is a popular Samsung mobile in Delhi.

It is ordinary looking mobile phone holds the dimensions of 110.4 X 60.8 X 12.1 mm and weighs around 105 G.
