Mixtape â€“ a Concept That is Catching up Rapidly by Johnathan Beal

Article published on May 31st 2012 | Music

Are you a mixtape enthusiast? Then some great news awaits you. There are services now available online which allows you to download free mixtape, check out the latest street albums, listen to the best DJ mixes and freestyle and much more. Websites that list free mixtape and can be yours for life can be browsed through to find your favorite blends and albums.

The name is suggestive enough of what a mixtape stands for. Modern day compilers believe that can make a statement or leave a message to their fans with mixtapes. The method is actually a collection of songs that is put together on a medium which can be physical or virtual. The final product reflects the style, genre and of course the attitude of the compiler. The idea follows an unwritten rule, a concept whereby the compilation is always a medley of oneâ€™s favorite songs, or tunes that reflect a set of emotions, a collection of the top songs of a singer or a band and so on.

You can find a large number of websites that offer mixtapes for a fee. You can even use these portals to upload your own personal compilation of mixtapes. It can be a good commercial venture for those who have an ear for good, catchy music. The websites can also serve as a medium to promote your brand of music online and can help you hit pay dirt if you are really good at what you do with your vocals or the instruments.

The rapidly spreading popularity of social media portals offer music and mixtape enthusiasts, an incredible opportunity to reach out to the widest possible audience. You must have a cover and a track listing to be able to upload your mixtape on popular portals. On the other hand, downloading mixtapes for free is possible from sites that allow you to do so without setting any conditions.

Choosing mixtapes is easy and quick because they are categorized based on themes. You just have to click on the theme of your choice and the whole list opens up for you to select your favorite song or music genre. You can even save the mixtape from the site to any file on your computer or compatible storage medium. The services can be used by just signing up. Some premium sites may require recommendations from your friends, family members or loved ones for you to access the mixtapes.
