How Heartgard Plus Prevent from Heartworms in Dogs?

by Anuradha

Article published on February 28th 2012 | Pets

Every dog is at risk of getting heartworms even if you pet is the most pampered or active or strong . Heartworms are worms which are transmitted to puppies or dogs by mosquitos. If your pet is not talking heartgard it is at risk of getting this desease - a potentially fatel disease. And if once this disease has attacked your pet the treatment can be expensive and difficult. Dont forget prevention is always better than cure and this heartgard plus will help you to follow the above said. It is made keeping in mind the taste of dogs and that is why it comes in real beef flavour according to prefrence of dogs. giving it once in a month will surely protect your pet from heartworms.

Heartgard plus are chewable tablets for dogs. They are made up of real-beef . It provides you protection against roundworms , hookworms and heartworms . It is generally given monthly or as prescribed by veterinarian .

Advantages :

1) They are considered the most tasty among all the other tablets of this family

2) Very efficient in controlling heartworms, hookworms, roundworms

3) Only needed once a month

Its working :

It contains an antiparassitic medication which prevent heartworm and it also contains Pyrantel Pamoate an anthelminthic which is used to protect dogs from roundworm and hookworms.

Things to be taken care of :-

1) They are chewable tablets and should be chewed and not swallowed whole . Preferably they should be given in pieces and fed to dogs. Make them eat the whole dose . It is very important to give these tablets every month on same day of each month throughtout the year and if in case it is missed more than 2 months the consult your veterinarian for the continuation of the medicine.

2) Do not take off chewable tablet from its wrapper until it is ready to give.

3) It is only for dogs and not for cats.

4) Do not give it to your pet if it is alredy taking another heartworm medicine.

It can be used for things other than listed here :-

American Heartworm Society has recomemded that it should be used year round for the prevention of heart worms.

Blue Chewable Heartgard Tablets (for Dogs 1-25 lbs) contains 68mcg Ivermectin 57 mcg Pyrantel Pamoate.

Green Chewable Heartgard Tablets (for Dogs 26-50 lbs) contains 136 mcg Ivermectin and 114 mcg Pyrantel Pamoate.
