Article published on December 11th 2011 | Photography

Photography not only means clicking a picture but to portrait a picture which tell about the character of a person and focus on a particular theme. To click any type of picture a photographer should focus completely on its subject and especially in fashion photography. The subject that is the model should be confident and self assured while posing for a picture. If model shows any sign of stress or neverousness then it will harm the quality of a photograph. Planning is very crucial before clicking a photograph. Think or plan before hand about the composition for each and every shoot of different models so as to make your model comfortable with your technique and composition. It is always advisable to discuss the composition of shoot with your model too.

Take advice from your model also that in which pose she is comfortable. Also, think about location and background before hand. Arrange the costume and make-up designers on time so that there will be no hindrance in your work. All these things are very vital in fashion photography. Fashion is all about dressing and make-up and how pretty you carry yourself. Thus without nice styling and perfect costume fashion photography is not possible.

A perfect pose to click a perfect picture is necessary. Highlight the body shapes of your model. Show the curves or make such poses that require angular body shapes can add to the beauty of your picture. Moreover, it helps to elongate body length of your model. Place and location has to be appropriate to do a fashion shoot. One thing which is must in fashion photography is â€œlighting â€œ. Thu it is always advisable to shoot in a studio for fashion photography. While shooting a photographer has to control lighting as he has to take the picture from different angle. At every angle he needs different type of lighting. Thus, in studio a photographer can easily control lighting and stabilize its model poses.

A right click at right time is required. Always try to capture the particular moment that alive for long span of time. Differentiate between poses. Always try to give variety in your photography. Shoot from different angles and focus on numerous parts of body to give your model photo a different look. Feel free to interact with your model. Take his ideas and suggestions and execute them with your ideas and option. It your photography give your best. Thus, take multiple shots and choose best out of them.

Most importantly, a photographer has to be aware of all the digital factors of shooting that are both internal as well external factors. Thus, one should be clear in its mind about camera and its setting. Donâ€™t forget to charge your battery otherwise it can be a poor sign on the part of your professionalism. One has to choose best place to shoot thus know your surroundings.
