Wedding Plan Phone Apps Save Time & Money by A Day Of Bliss

Article published on March 15th 2012 | Photography

While there are some important things you will still have to take care of the old-fashioned way, like choosing and hiring your wedding photographers, todays app technologies are a huge help in organizing some aspects of the wedding and reception. These apps offer tools for planning, budgeting and organizing. While there are apps for every platform, these are a few of the favorites for the iPhone:

1. iWedding iPhone Wedding Planner:â€“The free iWedding app is the ultimate wedding planner for the iPhone and iPod Touch. iWedding is an organizational app that allows couples to effectively manageday-to-day activities and to-do lists until the wedding day.

2. Wedding Wire:â€“Another great planning app, wedding details are always at your fingertips with WeddingWire's iPhone and iPod Touch application. Tracking payments, finding local vendors and managing the to-do list has never been easier.

3. Bride Guide:- Bride Guide is a wonderful wedding app for iPhone that lets you get things organized without missing out theminor details. This is essentially a comprehensive wedding planner that helps couples manage every aspect of the wedding ceremony.

4. Wedding Envi:- The Web is a great place to look for inspiration and ideas, but it can be disorganized and difficult to view on your iPhone window. Wedding Envi takes Web-based wedding images of all sorts, organizes them and displays them so you can get a better sense of what might work on the big day. Itâ€™s a great app for viewing wedding photographer portfolios.

5. Liza's Simple Soiree Party Planner:â€“This is a super useful app for planning the wedding reception. Couples will have fun planning the party with this simple, smart tool to keep every detail organized and at your fingertips.

These apps are great for helping with organization and there an equal number of excellent apps for computer desktops and other smartphone platforms. Each make the life of the bride and groom easier by offering everything from planning lists and budgeting tips to wedding photographer portfolios and research tips.

When it comes to wedding photography or wedding photo journalism there are a few creative apps out there that add interest and fun to the wedding photographers job. For example, The Photographerâ€™s Ephemeris (TPE) helps the wedding photographer plan outdoor photography shoots, particularly landscape and urban scenes.

With TPE a map-centric sun and moon calculator enables the wedding photographer to see how the light will fall on the land. It is useful day or night and for any location on earth.Advanced features of this wedding photography app include visual sun and moon search, automatic time zone and elevation detection, correction for atmospheric refraction and height above the horizon. It is one of the cooler apps available to wedding photographers.
