Satellite Receiver: Enjoy Uninterrupted Television Programs by [Julia Roger](#)

Article published on May 9th 2012 | [Satellite](#)

Satellite receivers are used to decode the signals received through satellite. They are used to receive television signals and are the broadcasting systems. They receive unencrypted signals, which are decoded by the receiver.

A satellite receiver is used for different purposes like receiving signals for different usages and Television signal is one of the functions mainly depending on the satellite receiver. The receiver is provided with a decoder chip to decode the specific codes received. The receivers also convert the digital signals into analog signals. The receivers also have the function of extracting individual channels from a larger satellite signal. The Free Sky or the free to air receiver is also a signal receiver for the Television channels. This is used in some countries to broadcast religious programs and educational programs.

Any satellite receiver does the work of receiving the signals, decoding them and sending them to give television programs or decoded version in any other form. Many establishments manufacture the satellite receivers and it is an on-going business. The demand is always there for this product as every person has or will aim at having a television in his house, office etc. This creates an ever-growing demand for the satellite receivers. Many people have found a career in this field of manufacturing Satellite receivers. There are different types of satellite receivers. While the primitive ones required to be installed at the top of the building for receiving signals, the present ones have been modified tremendously. They can be kept inside the house and there is no need to put them outside the building.

There are different price ranges from getting satellite television channels for domestic purposes. The price range varies from place to place. There are also some channels aired as free sky. Subscribers can choose what they need from the various options available
