UFO: real or fictional?

by Smmithunbd

Article published on May 20th 2012 | Science

Most probably, nearly everyone who has heard about UFO has the main reason to believe it really existed is due to the fact that certain people are claiming to have testimonies about its existence. The mere fact that a lot of people have already experienced having to witness the spacecraft to be hovering at the sky leads to a more distinct testimony that alien invasion is somewhat reasonable enough to be true. Though evidences such as videotapes and photos are escalating these days people are still not certain about its authenticity.

FACTS

Various facts have been collected and put together since the conspiracy came out. These are just some of the numerous facts that can possibly contribute to the very nature of its existence.

o There are certain reports that there were UFO seen and photograph during the mission made by NASA in the 1960s

o The very first photograph of the said aircraft was taken by an astronomer named Jose Bonilla in 1883 in Zacatecas, Mexico.

o The first sighting ever documented is in the Bible by the prophet Ezekiel

o Some people may even say that the sightings can happen every 3 minutes

o There had been numerous people claiming about UFO sightings since the 1940s

Evidences of their existence

Are they real or plainly just fictional?

These were just one of the few questions raised by mankind ever since the matter was brought into the topic many years ago. Now, how did mankind ever come up with those questions? Possibly because this is due to the number of evidences pertaining to the existence of UFO in the skies. Thus, what are really the evidences of their existence?

1. Visual - Being able to observe and visualize the actual spacecraft that is said to be hovering in the skies.

2. Physical Evidence â€“ sightings have an alarming increase since the past years and yet more and more people are claiming to have seen such things personally.

3. Radar â€“ almost all manmade aircrafts have radars and that there are a lot of issues too that there are unidentified things that are hard to explain by radar. Popular and keen investigations are still ongoing concerning how and why did this phenomena ever existed possibly in reality in fact some countries even sort out organizations to focus on what really is beyond that mystery.

PERFORMANCES

- Speed is one of the key elements of the said unidentified object. It is believed that it mainly travels at several thousand miles per hour

- Acceleration. It is also believed that common aircrafts made by man can only travel at certain acceleration but on the other hand the said unidentified object is dramatically speeding more than the limits of a common space shuttle.

- Silence. Though there are some speculations that UFO travels with a strange sound but some also said that in most cases they tend to be silent.

- Maneuver. Zig-zag flights are considered to be some kind of impossible to attain for common airplanes flying in the atmosphere so they are often believed to be an act of a UFO.

Due to the peopleâ€™s curiosity mankind has been really fond of mysteries and the unknown. And the presence of this UFO is not even an exception. For many years, the vast increase of issues concerning the existence of these unidentified objects is somewhat hard to predict. Though the subject isnâ€™t really concluded as to be true or fictional but it has taken a huge impact to the society. Still the vast emergent issues concerning its existence may not be brought to a halt, nobody canâ€™t stop anyone to believe they really did exist.
