How to be a Good Teacher and Influence Your Students by Mark Bennett

Article published on March 1st 2012 | Self Help

Growing up we assume that a perfect teacher is one who is loud and extroverted. You know someone whoâ€™d stand and inspire students with their all-round wonderfulness. To know what and how a teacher influences our life, you could surf the internet on your service provider like FiOS Internet and see the blogs and articles written by various students about their teachers.

We all know that teachers work with an audience that is by definition impressionable. It means that being a teacher comes with the added responsibility of also being a public figure. Like most jobs, this is quite demanding and the appreciation which you get is little. Besides that a good teacher always aims for the character development of the pupils. It starts with being a role model. Everything that is done and said is a reflection of oneâ€™s personal values. It isessential to be responsible enough to judge whether an act is morally good or not. This is because pupils tend to emulate what they observe in older people,specially their mentors.

This is where the power to understand a child becomes vital. It is when a teacher understands and identifies with the child that success in teaching is accomplished. When this materializes, it is only then the student is able to comprehend the meanings and is competent enough to practice whatever he has learned.

Also it is very important for a teacher to help students in developing the love for learning. A teacher who does not show zeal or eagerness will affect the pupilsâ€™ personal capacity to develop interest in the subject. Commitment is necessary in being an educator. Sincere concern on the students helps produce properly formed young minds. Now the question is what are the qualities a teacher should have. Well, there are many different qualities that a teacher should have for being known as a good teacher.

One of the most important qualities is the communication ability of the teacher. Only having a large amount of knowledge of something cannot make a good teacher. It is a fact that students who are taught by a teacher with whom they could communicate with much easier fares better than a teacher with whom students could not communicate. In fact a teacher, who communicates easily with students, can find more about studentsâ€™ learning skills and choose a more effective teaching method.

Another quality which a good teacher requires is to have creativity. A good teacher should always try to learn new methods from other good teachers; methods which are much more suitable for students. Itâ€™s a fact that young people like students always welcome new ideas, especially when it comes to education. In past years, it was only the teacher who was taking control of class but nowadays studies shows that sometimes a student can learn from another student more than being taught by the teacher; that is why education systems insist on forcing students to take part in teaching methods by giving lectures or even explaining a certain content for other students.

An important thing about being a good teacher is not to discriminate. A good teacher should know that the only difference between students is that they learn things in different ways not that some of them can learn and some canâ€™t. Otherwise the good student might not get better and the bad student will not improve.

Frankly being a teacher is no walk in the park. There are a lot of personal sacrifices that you have to make, but it becomes worth when you see your student being one of the best and most successful person in the world.
