Award medals and trophies date to school and college life. The medals received are a mark of memory of the past achievements. Medals show the hard work put in to achieve the glory. Achievements may include sporting events or an appreciation at work or studies.

This immense pleasure achieved by the student provides an unforgettable experience for entire life ahead. Award medals always provide great honor to the students to be awarded for a medical or academic achievement or the case might be in the field of excellence in the arena of sports as well. Sports can never be neglected because it is one of the most important co-curricular activities that are mandatory for the overall physical growth of the student.

Award Medals are not only awarded to school and college going students but they are given to the people who excel in the field of modern science and technology. Awards are also awarded in the field of science and technology, research in medical sciences and the academic field.

Plaque engraving is one of the best ways to provide a shining look to medals. Such engravings add a glittering effect to the medals. This is one of the best techniques someone has discovered for enhancing the quality of the medals. Many people receive medals from the state governments or from the national governments for making a breakthrough in their modern inventions in the field of science and technology. NASA, well known lab for space and modern science technology, awards medals to their young and energetic engineers for their excellence at work in their respective domains. The national medal is also very prestigious which is offered by each and every country to their young scientists in the field of research and technology.
