New Apple iPhone 4s with Excellent Features by Marshall Aido

Article published on May 23rd 2012 | Shopping

Apple iPhone 4S Unlocked â€“ with Siri, Facetime and Skype selling on online shopping sites in UAE, GCC and Worldwide

The iPhone 4S was unveiled at an Apple event in Cupertino California on 4th October 2011 and sold 4 million units within the first 3 days through pre-orders and sold 37 million phones over the Christmas holiday season.

The availability of Apple products in the Middle East has not been as widespread and easy though and customers have relied mainly on online shopping websites like AIDO.com who sell all Apple products â€“ iPhone, iPad, iPod, iTunes Gift Cards and Macbooks.

AIDO.com launched the Apple iPhone 4S on their website for sale in November and saw their visits and sales skyrocket due to the demand from the UAE, GCC and all over within the Middle East. The key features on the iPhone 4S like Siri, Facetime and Skype are usually blocked by the mobile operators in the region; but if customers buy unlocked version of iPhone 4S from websites like AIDO they can use the phone worldwide with all features.

iPhone 4S â€“ Features:-

Siri

Use voice commands to use your iPhone. Siri understands what you say and interprets the meaning as well. It figures out the right apps to use to find the right answer. Then, just like a personal assistant, it answers you. Makes phone calls, sends messages, schedules meetings, sets reminders â€“ all with Siri

Skype

Make free computer-to-computer voice and video calls and call your friends all over the world on their mobile phones at cheap rates â€“ all through your existing data plan and connection. You just need to register for a Skype account and top it up with prepaid credit.

FaceTime

FaceTime lets you hear a voice and see the face that goes with it â€” iPhone to iPhone, iPad 2, iPod touch, or Mac over Wi-Fi. Making a FaceTime call is just as easy as making a phone call. And itâ€™s even easier with Siri. Just tell Siri â€œFaceTime with Momâ€• and you show up, smile, and wave hello.

iTunes Gift Cards

Buy the latest movies, music and TV shows for your iPhone 4S

iCloud

Appleâ€™s iPhone 4S features the new iCloud service for wireless remote access of music from all computers and mobile devices. The iCloud stores your photos, music, apps, calendars and documents and wirelessly transfers to all your devices.

â€œOur new website design that went live in January 2012 has made it so much easier for potential customers to discover products theyâ€™d like to purchase. That combined with our Cash on Delivery service offered in UAE has tripled our sales in a matter of a couple of monthsâ€•, says Pavan Amarnani, CEO of AIDO.com
