Step-by-Step Guide on Reglazing Glasses by [Bobby Barret](#)

Article published on July 24th 2012 | [Shopping](#)

Reglazing glasses is growing popular with spectacle wearers today with their easy step-by-step guide of the service. Customers are not kept in the dark or put on the sidelines when it comes to reglazing their glasses; after all, it is their glasses and they are paying for the service. They have every right to know and understand the reglaze service to be comfortable with it as well as know what they are paying for.

The reglaze process takes only a few simple steps or stages which consumers can follow easily to enjoy their new lenses.

Step 1

The very first step to kick start the new lens process is for the consumer to request for an Information pack to be sent over. This would activate the reglaze company's process where a Freepost pack is sent to the consumer.

This request can be made over the phone or online through the reglaze company's website. An email request is also possible to the convenience of the consumer.

Â

Step 2

When the consumer receives the pack from the reglaze company, there would be the simple instructions included to assist the consumer on the next step. The consumer basically has to send in the latest prescription and preferred pair of frames to be reglazed with the new lenses.

If the consumer cannot secure a copy of their latest prescription, the reglaze company can obtain a copy of their behalf with the relevant information from the consumer's optician.

Â

Step 3

Once the reglaze company receives the consumer's pack, they would establish the lens type from the submitted prescription. Personal contact would be made to discuss possible lens options with the best professional advice and recommendations. A quotation would be given on the reglaze service; at this point in time, it is up to the consumers to decide to go ahead with the reglaze or not.

If affirmative, payment is made and the glasses are reglazed; else, the frames are sent back to the consumer.

Step 4

Once the glasses are reglazed, they would be returned to the consumer in the sturdy and protective pack. The reglazing process would normally take a couple of days unless the required lenses are currently out of stock. Hence, some time is needed to order the required lens before reglazing can happen. Varifocal lens would take longer as they are customized lenses; two weeks would be expected on varifocal reglazing. Bi-focals reglazing duration can be slightly shorter.
