In this modern era, security is one of the most concerns everywhere whether it is railway stations, airports, colleges, institutes or many private as well as government offices. There can't be done any compromise with the security. There are various resources available for surveillance system; cameras are one of the most important sources that are used for it frequently. Although varieties of cameras are available in the market, however you can choose the best one according to your specific needs and requirements, that too within your financial limit. You can purchase it at online store as well as in physical stores. Online stores usually provide fabulous offers and discounts to customers in comparison to physical stores.

CCTV (Closed Circuit Television) cameras were frequently used. These are still in use but due to technical advancements, its various varieties are available such as IP Camera along with many others which have many variations. It also referred as Internet protocol camera is a kind of digital video camera which is usually used for the surveillance. It is unlike CCTV cam. and as the name suggests, it can send and receive data over computer network and Internet. That's why they are also referred to as Network Cameras. Webcams are perfect example of this kind of camera but IP is especially used for the surveillance purpose. There are two types of IP cameras which are below mentioned:

Centralized IP cameras: It is used to handle the video, recording as well as alarm management through a central Network Video Recorder (NVR).

Decentralized IP Cameras: It has in-built recording functionality and it record directly to the digital storage media like hard disk, network attached storage device as well as flash drive without using a central Network Video Recorder (NVR).

If you are going to install them in your offices for the surveillance purpose, you must buy them of reputed brand which normally come with warranty. Moreover, a prominent brand has several service centers and you can easily check out and replace your equipment in case of any kinds of defect or technical problems. If you want to get detailed information about various kinds of cameras that you can use as per your needs and requirements, go through the Internet. There are various websites available where you can get the detailed review, price along with other information. You can also get the reputed online shop lists in these websites along with their contacts details and address.
