Things to look for while buying a E-Book Reader by Daniel Brooks

Article published on May 19th 2012 | Shopping

This era is of digitalization, means everything is digitized. Our favourite books are also becoming part of this trend. This has given a requirement of such device which could provide us the real reading experience with out any strain, and e-book readers are such devices that are fulfilling the need. But before going to buy any e-book reader one should check for his requirements or features that he wants in an e-book reader. Some of the common feature that should be looked for are as follows:

Connectivity: The very first feature that a buyer should see in an e-book reader is the type of connectivity the device offers. The buyers have two types of connectivity options available in the market:

1. Wi-fi Connectivity: This option is the best for those who don't have to travel a lot, means one can get to the wi-fi access point at a time and can download the content of his choice to be viewed later.

2. 3G Connectivity: This type of connection is for power users means those who needs to be connected with internet 24*7, like the people who are frequent travellers.

Format Support: One of the major feature that should be looked after is the format of the files supported by the reader, some of the essential types are PDF, html, mp3.

Bookmarks: While opting for an ebook reader one should look for an option of bookmarking which should be the feature of any reader.

Storage: other thing that should be looked after is the storage capacity of the device, and that should be the memory which could be used by the consumer.

Screen friendliness: the primary feature of an ebook reader is readability of e books, means the books should be easily viewable, means it should look like a page of a book.

Size: The size of the reader should be such that it should be comfortable to read for long hours.

Reflectiveness: This factors should be kept in mind while going to get an ebook as the content would be unreadable in sunlight or under lights.

Weight: The weight of the reader should be as low as possible as it would assist in long time reading without any pressure on hands.

Battery Life: the battery life of the reader is shown by the number of pages turned that means the larger the number of page turns the longer the battery life.

Shareability: the reader should have an option for the sharing of the files between two devices. Means if a book is liked by one, then he could share it to other's devices.

Own E-Book Store: The reader should own a huge library of free books to offer to their consumers.

And Amazon has kept all the above mentioned points and the result is a wide range of kindles to choose from.
