What You Have to Know About Vision MX by [Lenie Smith](#)

Article published on May 18th 2012 | [Shopping](#)

Vision MX is a family run business born from their passion for motocross. They have ridden, watched and then helped in most of the aspects of the sport for many years. Other than that, they also understand the passion as well as dedication involved with this matter because of the fact that, they are also a family of dirtbike riders. As a business, they recognized that people really need to have a good quality as well as durable products that are readily available at competitive prices. They also understand the importance of this and aim to give you only the excellent service from start to order to after sales.

During the 2008 season, they will be 'on site' running the spares van at Kensworth Schoolboy MX club. Their 2000 square foot retail outlet will be going to open its doors at end of March and welcome all visitors. If you can see its shop, it is actually very customer friendly with experienced staff on hand which includes an on site mechanic for any repair work from engine rebuilds to replacing an inner tube. They can also assure you they have an easy free parking, free hot drinks and a widescreen T.V so that you can still watch your favourite mx dvd's popping in for a bottle of oil should be a good experience. Come and check out their large display of motocross accessories and clothing.

Other than that, the original version of the Contour helmet cameras or CountourHD was responsible for taking shoot-and-share technology to a whole new level. It was also designed for the less experienced user who wants a simple-to-operate HD camera without even the complication of the multiple configuration setting as well as up-to-the-minute hardware, the ContourHD records in butter-smooth 720 HD and then delivers rich as well as vibrant colours and super-clear action. That is why with this, it is always for sure that there are also lots of people who are coming to Vision MX so that they can also have their own helmet camerahelmet cameras.

The wide angle of 135 degree glass lens will also offer you an excellent and exceptional performance in almost all of the light conditions wherein there will be no image that will bleed or even skipping and the unit will just allow you to view your playback on a wider variety of computer hardware or even through Quick Time applications. Also, lens rotates 180 degrees, with twin lasers that will help you to set the correct orientation and horizon MicroSD card storage as well. Moreover, if you are looking for something that will fit to your needs regarding with this matter, don't hesitate to come and visit Vision MX so that you will also be helped immediately.
