As you know, after iOS5 released, nearly all the Apple devices are updated to iOS5, while in this way, it bring a lot of inconvenience to us. For the old version of 3herosoft iPod to Computer Transfer doesn't work well with iOS5.But now, there is no need to worry about that,beause 3herosoft ipod to computer transfer is upgraded and now it can go well with iOS5. You can not only transfer all kinds of files from iPod, but can also add music, videos and photos from pc to iPod Touch with iOS5, and the program will never got crashed.

The latest functions

Apple iTunes 10.5 update is supported fully

Transfer SMS from iPhone to computer as .txt file

Transfer Call List from iPhone to computer as .txt file

Transfer Contact from iPhone to computer as .txt and .csv files

Transfer playlists from iPod/iPhone/iPad to local folder or iTunes

Transfer photos to iPod touch/iPhone/iPad with iOS 5.0 or above

How to add photos to your iPod Touch with iOS5?

Step1: Install 3herosoft iPod to Computer Transfer and Run it

Launch this iPod transfer software and connect your iPod to your computer. Then you can see your iPod on the desktop -- an iPod icon with your iPod's name under it. Then familiarize yourself with its interface. All information about your iPod, such as type, capacity, version, serial number, and format, will be shown on the main interface.

Tip: All functions for iPod are applicable to iPhone as well except for the photo management.

Step2: Select pictures you want to put

In this screen, just select and check the pictures from computer you want to put to your iPod, and then click the "Add Files to iPod/iPhone" button to transfer the pictures to iPod for OK.

If you want to add all the files in a folder, please click the "Add folder to iPod/iPhone" button and then locate the folder on your computer and transfer the whole folder to iPod.

Step3: Put pictures to iPod touch

After it is done, then press the "OK" button in the dialogbox. After that, the selected pictures are put to the iPod with fast speed right now! With this step, you can also backup or copy music, TV Shows, videos, pictures and podcasts etc. from your computer to iPod/iPhone.

Very nice, simple and straightforward, once you adjust the preferences as needed. After this tutorial, you will find that it's so easy for you to put pictures to iPod touch with the help of 3herosoft iPod to Computer Transfer software. It's universal and powerful that you can also backup music, video and podcast from computer to your iPod/iPhone.
