A Magic Trick to Convert HD to iPad by [Vivianusgong](#)

Article published on April 1st 2012 | [Software](#)

When playing all various format videos or movie on your iPad, you should consider whether your movie is compatible video format for iPad. Since the Apple iPad will not allow you to watch HD videos (.MTS, .M2TS, .MKV, etc), you need to ask for a useful video converter to convert HD to iPad supported MP4, H.264 video. Let me propose iPad Converter Suite for HD to MP4 converting.

If you are a super iPad fan, iPad Converter Suite is definitely your best choice. This software pack integrates four useful software, including DVD to iPad Converter, DVD Creator, iPad Video Converter software, and iPad Transfer software. All these four kinds of software are great assistants to your iPad.

Far more than convert HD to iPad, with this iPad software pack, you can rip any DVD files (DVD-Video, DVD folder and DVD IFO file) to iPad. Also you can convert all popular videos/audios (MTS, M2TS, AVI, WMV, TS, MOV, MP3, AAC, etc) to iPad formats. While the iPad Transfer realizes files transfer from PC to iPad, from iPad to PC and from iPad to iPad.

Apart from the major functions, iPad Converter Suite also provides lots of useful editing functions. You can trim any video segment, crop video frame, and watermark your video. Moreover, you can even join multiple pieces of videos or audios together as a single one.

A tutorial will show you a really easy solution to convert HD to iPad in full screen for great enjoyment.

* Step 1: Installation

Download iPad Converter Suite, install and launch it.

* Step 2: Load files

Click "Add File" to load the video that you want to convert to iPad.

* Step 3: Choose output profile and settings

From "Profile" drop-down list you can choose your output profile according to your need.

You can also click "Settings" to adjust the settings of your output video, such as "video/audio encoder", "Video/audio Bitrate", "Channels", "Resolution" and so on.

* Step 4: Video editing

1. Effect

Click "Effect" to make special effect for your video.

You can adjust the "Brightness", "Contrast", "Saturation", etc. and also you can use "Deinterlacing" to improve you output effect.

2. Trim:

"Trim" function allows you to pick up any segment of your video to convert. You can just convert

your favorite part in the video.

3. Crop:

Cut off the black edges of the original movie video and watch in full screen on your iPad using the "Crop" function.

* Step 5: Conversion

After you have done all the steps above, start to convert HD to iPad. And then you can import the files to iTunes and sync to your iPad for playing.

In addition to its powerful format support and editing function, it can also save your time greatly with batch importing and fast speed of video conversion.

If you have HD video downloaded from internet or recorded by your HD Camcorder, use iPad Converter Suite to convert HD to iPad for more enjoyment!
