Advanced MTS to iMovie converter for Mountain Lion by Nadia

Article published on March 6th 2012 | Software

According to news released in Appleâ€™s official website, Macâ€™s new OS named OS X Mountain Lion will arrive this summer with all-new features inspired by iPad, which is promised to be the worldâ€™s most advanced desktop operation system.With Game Center, Notification Center, Documents in the Cloud, new sharing capabilities, advanced security features and so much more, you can build the most innovative Mac apps ever.

As we all know, there are a large variety of features on iPad 2 or iPad 3, but this time, all these features can be available in OS X Mountain Lion, like iCloud, Messages, Reminders, Notes, Notification Center, Share Sheets, Twitter, Game Center, Airplay Mirroring, Gate Keeper. Besides, it also delivers a new Mac experience in China.

Section 1. MTS to iMovie converter for Mac Mountain Lion

MTS to iMovie converter for Mac is a professional program for Mac users to convert MTS files from Canon, Sony, Panasonic, JVC and Sanyo etc camcorders to iMovie supported formats: MP4, DV, MPEG-2, HDV, MOV etc, then import converted MTS video to iMovie`08, MTS movie to iMovie`09, MTS files to iMovie`11 for further editing on Mac.

Additional,MTS to iMovie Converter Mac has advanced editing function. It allows us to edit AVCHD.MTS files: Clip(set start and end), Crop(set aspect ratio 16:9/4:3), Merge(join several MTS files into one), Apply effect(adjust brightness, contrast, and saturation etc), set output parameter(adjust resolution, Frame Rate, Encoder and Bitrate), Snapshot, Rotate etc on Mac os x.

Section 2. Step by step on importing and converting MTS to iMovie

Step 1. Download

Free download "iOrgsoft MTS to iMovie converter for Mac", install and run it.

Step 2. Load MTS files and set output formats

Click "Add Files" to add MTS files, batch convert supports.

Then, from the expanded menu, choose output formats for your files and select a folder to save your ripe MTS, you can set video resolution etc by click "Setting".

Step 3. Convert

One simple click on "Convert button", you can finish your conversion quickly with MTS to iMovie converter for Mac, then import converted MTS files to iMovie for further editing on Mac.

Optional step: Edit your MTS files using MTS to iMovie software by click "Clip", "Edit" etc, just try by yourself.(want to make your video special? donâ€™t skip this step)

Section 3. Why we need to convert MTS?

MTS and M2TS are file extensions for the same AVCHD and both support 720p and 1080i HD video formats.

iMovie is a proprietary video editing software application which allows Mac users to edit their own home movies. Users can edit the video clips, add titles, and add music. Effects include basic color correction and video enhancement tools, and transitions.

AVCHD.MTS files always can not be natively supported by various software or device. iMovie'09 says can accept MTS clips, but only when they are running on an Intel-chip based Mac. A PPC Mac won't work.
