Canon XF105 MXF to FCP Converter- Convert Canon XF105 MXF Files to FCP for Editing by [Scott](#)

Article published on May 23rd 2012 | [Software](#)

This Canon XF105 camera also takes Material Exchange Format for its file structure, and that is the same with other Canon XF series cameras. With MXF the XF105 can benefit from high level of compatibility with NLE systems and ensure high quality output. However, all cameras generate MXF files have a common problem, they shot high quality videos but these videos cannot imported into FCP for editing.

FCP is a powerful video edit software, it is easy to use and can create great effects, even more valuable, it is free for Mac users. But FCP is not compatible with MXF files, and that question bothers many people who use a MXF generated camera. So, is there a way to solve that problem? The answer is certainly yes, people just need a MXF to FCP converter to convert Canon MXF files to FCP compatible format. But the question is which MXF to FCP Converter is better? A good MXF to FCP converter should has such features: fast convert speed, high quality output and easy to handle. To that point, the Canon XF105 MXF to FCP Converter is pretty good.

The Canon XF105 MXF to FCP Converter is very easy to use and it can convert Canon MXF files to FCP in a short time. And also this XF105 MXF to FCP Converter can preserve the quality of original video during converting. Additionally, this Canon XF105 to FCP Converter also has functions of video editing, with it people can prepare for final editing with FCP.
