Convert from PDF to Word and Edit the PDF Files Easily!

by Alicestephen

Article published on March 16th 2012 | Software

Both Word and PDF formats are useful in present era of data transfer, and they cannot take each otherâ€™s place. However, PDF is a read-only format which restricts you from editing the file or adding any new data or information into it. Thus, it becomes very important to convert from PDF to Word, in order to edit the information in a hassle-free manner and re-using that information for several purposes. Actually, PDF has been extensively used to share files on the large network, for a reason that nobody could change it so easily. To make it even more secure, many users set certain priorities and passwords while uploading eBooks or while attaching PDFs to their emails. So, PDF to Word Conversion is needed for using the data contained in PDF documents.

But, how would you perform such conversion? The answer is Docsmartz PDF to Word Converter. This is a software program which converts a file from PDF format to Word without making any effort and spending much money. It is an easy-to-use application and can be installed and downloaded in an unperturbed way. When you get converted Word file, it will appear as a mirror-image of PDF file without any distortion of images, text, graphic symbols, columns and hyperlinks etc.

Some of you might be thinking that you can easily copy the data contained in PDF and paste it in Word. It is so simple. But, have you tried it out before? You will lose all formatting, layout, columns and many other components of the file during conversion. Thus, a good quality convert PDF to Word Software is really necessary.

There are several reasons for using the Docsmartz PDF Converter:

1. Accuracy â€“ The software will provide you complete accuracy during conversion. The source and output file will be same in appearance.

2. Easy Editing â€“ Editing of PDF file will become easier. All restrictions, regarding adding / removing the content and graphics, will be removed.

3. Least time â€“ It will take minimum possible time of the user in conversion from PDF to Word.

4. Partial and Batch Conversion â€“ The converter provides you an option to partially convert and batch convert PDF files. In partial conversion, you can give a range of some pages to convert (like 1-5); in batch conversion, you can select multiple files to convert into Word once.

Docsmartz PDF Converter Software is a stand-alone tool that is used offline once you have installed it in your PC, requiring no internet connection.
