Convert Units at a Click with Universal Converter by Terry Littrell

Article published on April 19th 2012 | Software

Converting measurements can be a tedious task some times. In order to get on time exact results, a lot of calculations are required. But having a mechanical application is far more accurate as it is quick in response. An application dedicated to conversion of data works best. Universal Converter is one such application.

Universal Converter is a Metrics Converter in 6 languages English, Spanish, German, Dutch, French, and Arabic. Universal Converter facilitates converting the following metric system UK and US for following imperial metric units at the touch of a button:

Temperature, Distance, Weight, Angle, Bits and Bytes, Electric current, Energy, Force, Fuel, Consumption, Power, Speed, Area, Time, Frequency, and Pressure.

An easy-to-use application, it is built to make conversions quick and easy. Just open the app, select your conversion units and type in the value, then click on 'Convert' for instant results. This conversion application is specifically designed and developed for iPhone, BlackBerry and Android smart phones. Universal Converter is suitable for all Android OS mobiles with OS 1.5+ and supports multiple resolutions. It is suitable for all BlackBerryÂ® OS mobiles with OS 4.5 and supports multiple resolutions.

Developed exclusively for three platforms, it targets the user base of these widely popular mobile platforms. The metric units can be converted in Universal Converter with only a few clicks.

Universal Converter operates smoothly to give out accurate results through mechanical skillful calculations. It gives accurate and instant outputs to all the inputs. The application is designed to make conversions as simple as possible and quick. With a dedicated converter applications installed in your smart phone like Universal Converter, carrying out conversions will never take as long as they traditionally do. The objective of developing a mechanical converter is to save on time immensely and boost the efficiency levels. Universal Converter Version 1.0.2 comprises of four newly added features such as Time, Fuel Consumption, Area and Volume (updated with gallon units). This native application also offers dynamic features like:

1. Accurate Results

2. Instant Output

3. No need for Internet connection

4. Available in 6 languages (English, Spanish, German, Dutch, French, and Arabic)

It is a free application which will be highly useful for teachers, students, and statisticians by and large. The efficiency with which Universal Converter responds is remarkable.
