You Get High Tech Security System for Your Data

Tax preparation firms or certified tax professionals get high tech security system for their clientsâ€™ highly sensitive data. Automatic fire alarm systems, high quality smoke detectors, closed circuit surveillance cameras, high tech biometric security scanners, and other various types of security systems are deployed by a cloud hosting service provider in order to protect its world class data center facilities from threats and intruders. Drake Tax Software hosting solution vendor makes use of Statement on Auditing Standards (SAS) No. 70 Type II and tier four grade data center facilities. At the conclusion of a SAS No. 70 service auditor's examination, that is, SAS 70 audit, the service auditor renders an opinion on the following - whether or not the service organization's description of controls is presented fairly; whether or not the service organization's controls are designed effectively; whether or not the service organization's controls are placed in operation as of a specified date; whether or not the service organization's controls are operating effectively over a specified period of time (SAS No. 70 Type 2 only). When the service auditor concludes that the above items have been accomplished, the service auditor renders what is referred to as an unqualified opinion. While a SAS No. 70 audit is technically not a pass or fail audit, the receipt of an unqualified opinion from the service auditor is often referred to as passing the audit.
