Article published on January 11th 2012 | Software

Document scanning, although it seems simple, can be a quite complex task. First, you have to apply the appropriate scanning settings according to the type of documents you need to scan. Then, you have to key in the right indexing information to make the scanned documents easily retrievable. Finally, you have to export the document to your document management application, this might be even more complex when it comes to export the document to the rapidly increasing cloud file management services.

With the new eDocScan all your document scanning and document management problems are over.

eDocScan is a very easy to use and productive document scanning software, which lets you Scan, OCR, Index, Organize and Export any type of document including business cards, and checks.

With eDocScan you can scan your documents directly to popular Cloud services like Box.net or any compatible service, so that you can have access to your documents from any smartphone or tablet, wherever you are.

eDocScan is a unique combination of the most advanced technologies in document scanning, PDF conversion, OCR and Document Management with a very easy user interface, providing productive scanning features such as :

â€¢ Check scanning

â€¢ Automatic document separation

â€¢ Barcode Recognition & indexing

â€¢ File name indexing

â€¢ Intelligent zonal OCR indexing

â€¢ Enhanced OCR functionality

â€¢ Configure scanning workflow profiles

â€¢ Scan to PDF (text Searchable)

â€¢ Convert PDF to Word

Moreover, eDocScan provides you with a very easy to use scanning interface that will work exactly the same for all scanning devices, whether youâ€™re using a flatbed scanner, document scanner, or an MFP unit.

eDocScan can become your ultimate scanning productivity tool, as the document scanning tasks are performed much more efficiently, thanks to the automated document scanning, filing and export functions.
