So, you want to get Hulu outside the US? Well, currently, Hulu only has streaming rights for content in the United States and Japan. So, you might think if you are not in one of those two countries, you wonâ€™t be able to watch Hulu at all. Lucky for you, thatâ€™s just not true anymore!

With the continued development of amazing technology, you can get Hulu outside the US A virtual private network (VPN) is one of those awesome technological developments that will allow you to work or play in a virtual environment wherever there is internet access. The technology used by a VPN allows a single computer, using a public internet connection to join a private network by creating a â€œtunnelâ€• between the network and whatever device you are using, thus allowing you to Hul outside the US This tunnel plows through unsecured connections and provides layers of protection for your personal or business data, and thatâ€™s peace of mind that is worth the price.

Speaking of VPN, this is the best way to get Hulu outside the US We suggest you connect to a US based VPN (Editorâ€™s note- we like streaming VPN for its speed, price, and free trial). Then you can even watch Hulu in New Zealand! Get your VPN set up, go to www.hulu.com and start streaming your shows.

Hulu is a free service that allows you to watch an unlimited number of videos online. If you are a movie buff or a TV fanatic, youâ€™ll be disappointed if you canâ€™t get Hulu outside the US Once you ge your VPN service up and running, you can watch over and over again.

Hulu also has an additional program called Hulu Plus which is a paid subscription service. The basic differences are that Hulu Plus has a much deeper library of available content, greater options when it comes to which devices can be used for viewing, and better quality viewing, even streaming in HD when it is available. Hulu is limited to a PC environment while Hulu Plus supports gaming consoles, TVs, Roku, blue-ray players, iPhones, iPads, and several other internet connected devices, so you can Hulu outside the US If you are having difficulty watching Hulu, make sure your device or PC is connected to the internet. Remember that Hulu will only work on a PC, so donâ€™t expect to pick it up on your iPhone. If you want to watch it on the go, you will need upgrade to Hulu Plus, which will work great with a streaming VPN and allow you to get Hulu outside the US
