How to Convert SWF to 3GP on Mac for Mobile Phones by [HankHebrew](#)

Article published on April 6th 2012 | [Software](#)

3GP (3GPP file format) is a multimedia container format defined by the Third Generation Partnership Project for 3G UMTS multimedia services. Most 3G capable mobile phones support the playback and recording of video in 3GP format.

Converting SWF to 3GP on Mac enables you to play SWF movies on mobile phone with ease. Then we come to the question: how to convert SWF to 3GP on Mac OS. In this article, I'd like to recommend you a powerful SWF to 3GP Converter Mac that helps you convert SWF file to 3GP easily within a few clicks. That is Higosoft SWF Converter for Mac.

This SWF Converter supports converting two sources of SWF to 3GP on Mac: SWF files from your own computer, or SWF files on a webpage. To help you save time, the batch conversion feature enables you to convert several SWF to 3GP each time.

Step-by-step Guide to Convert SWF to 3GP on Mac with Higosoft SWF Converter for Mac

Step1: Free download this SWF to 3GP Converter Mac and run it on your computer

Step2: Add local SWF files for converting by clicking Select File. Or choose an online SWF file for converting by clicking Grab SWF.

Step3 (optional): Edit the imported SWF file by clicking Crop. In the coming pop-up panel, you can adjust the SWF displaying dimension, add image watermark to the output SWF video.

Step4: Click the drop down list from Profile option and choose 3GP as the output. Then click Next button to proceed.

After all necessary settings have been done, click Convert button to begin to convert SWF to 3GP on Mac. In a few minutes, this Mac SWF to 3GP converter will present the converted SWF movie in 3GP format for you with high quality.

It's just so easy. Free download this Mac SWF to 3GP converter now to start the conversion process of SWF to 3GP on Mac.
