Article published on March 5th 2012 | Software

What to do if you want to play AVI on Apple TV? As a digital media receiver manufactured by Apple, Apple TV allows you to enjoy iTunes movies, television shows and music in your living room on your television. Just like iPods and other apple products, Apple TV doesnâ€™t support AVI files, either. In order to play your AVI file on the Apple TV, you must firstly convert AVI to Apple TV format. And to do this, the best way is to use an AVI to Apple TV converter.

How to choose a AVI to Apple TV converter?

With so many apps to choose from, itâ€™s easy to download a stinker. Following are some factors you should take into considerations in selecting an AVI to Apple TV converter.

1. Fast converting speed.

2. Support a lot of formats and devices.

3. Easy to use.

4. Powerful editing function.

5. Reasonable price
